PROFILE

System Operations Engineer with 6+ years of experience designing, automating, and operating scalable enterprise IT environments. Specialised in macOS and Windows endpoint management using Jamf Pro, Microsoft Intune, Apple Business Manager, and Windows Autopilot, identity lifecycle automation (JML — Joiner, Mover, Leaver) with Okta (SSO, MFA, Workflows), Active Directory, and Azure AD/Entra ID, and SaaS platform administration across Atlassian Cloud, Microsoft 365, and Google Workspace. Experienced in scripting with Bash, Python, and PowerShell, REST API and Microsoft Graph API integrations, and Windows Server administration including Group Policy (GPO), DNS, and DHCP. Holds Jamf Certified Associate credential. Proven track record of reducing manual effort, strengthening security posture, ensuring GDPR compliance, and delivering reliable IT operations in fast-growth organisations.

Fluent English (C1)

Valid EU Bluecard residence permit · Berlin, Germany

Identity & Access Management | Identity Lifecycle (JML) | Okta | SSO & Federation | RBAC & Role Mining | SCIM Provisioning | OIDC | Zero Trust | Conditional Access | Endpoint Management | Windows Autopilot | End User Computing (EUC) | MDM | IT Operations | SaaS Administration | Automation & Scripting | Help Desk | End User Support | ITSM | Service Desk | Security & Compliance | GDPR | Group Policy (GPO) | M365 Administration

CORE COMPETENCIES

- **Endpoint & Device Management:** Jamf Pro, Microsoft Intune, Apple Business Manager, Windows Autopilot, macOS and iOS fleet management, Windows endpoint management, Mobile Device Management (MDM), End User Computing (EUC), zero-touch deployment, OS imaging, device provisioning, application packaging, patch management, endpoint compliance, configuration profiles, BitLocker, FileVault, remote support, RDP
- **Identity & Access Management:** Okta (SSO, MFA, lifecycle management, Okta Workflows), Active Directory (ADUC, GPO, OU), Azure AD / Entra ID, SAML, OAuth 2.0, OIDC, LDAP, IAM, identity lifecycle (JML — Joiner, Mover, Leaver), RBAC, role mining, SCIM provisioning, Zero Trust, Conditional Access Policies, Privileged Access Management (PAM), user provisioning/deprovisioning, access reviews, SaaS access governance, Google Workspace integration
- **Automation & Scripting:** Bash, Python, PowerShell, Microsoft Graph API, REST API integrations, workflow automation, process automation, workflow orchestration, iPaaS, Workato, Zapier, GitHub Actions
- **Infrastructure & Networking:** Windows Server (2016/2019/2022), Active Directory, Group Policy (GPO), DNS, DHCP, TCP/IP, VPN, RDP, Microsoft 365 Admin Center, Exchange Online, network fundamentals
- **Cloud Platforms:** Amazon Web Services (EC2, WorkSpaces), Google Cloud Platform, Microsoft Azure, VMware virtualisation, Terraform, Infrastructure as Code (IaC)
- **ITSM & Collaboration:** ServiceNow, Zendesk, Jira Software, Jira Service Management, Confluence, help desk, end user support, remote support, escalation management, ITIL practices, incident management, change

management, Change Advisory Board (CAB), CMDB, SLA/SLO management, 1st–3rd line IT support, user onboarding/offboarding, knowledge base management

- **Asset & Lifecycle Management:** Snipe-IT, CMDB, hardware asset management, IT asset lifecycle management, IT procurement, device decommissioning
- **Security & Compliance:** SIEM platforms, OpenSearch, CIS Benchmark, Zero Trust, endpoint security, access control governance, BitLocker, FileVault, Gatekeeper, backup and recovery, GDPR compliance, audit readiness
- **Productivity & Data Analysis:** Microsoft Excel, Google Sheets, data analysis and reporting, operational dashboards, KPI tracking
- **Observability & Monitoring:** Prometheus, Grafana, Alertmanager, real-time system monitoring
- **AI-Assisted Workflows:** Google Gemini, Claude, ChatGPT, AI-assisted documentation, troubleshooting support, workflow optimisation

PROFESSIONAL EXPERIENCE

System Operations Engineer

Nov 2025 – Dec 2025

Ada Health GmbH

Berlin, Germany

- Designed, operated, and optimised internal IT infrastructure across Okta, Jamf Pro, Intune, GitHub, Google Workspace, Google Gemini, Atlassian Cloud, Cloudflare, Microsoft 365, AWS and GCP, maintaining high platform availability.
- Led macOS and Windows endpoint management using Jamf Pro, Intune, and Windows Autopilot, zero-touch device provisioning, OS imaging, configuration profiles, patch compliance, and scalable onboarding/offboarding workflows.
- Implemented Okta Workflows and API-based automations to manage full identity lifecycle (JML Joiner, Mover, Leaver), reducing manual provisioning effort by 40%, integrating 15+ SaaS platforms with SSO, MFA, RBAC and least-privilege access controls.
- Administered Microsoft 365 Admin Center, Exchange Online, and Conditional Access Policies across Azure AD/Entra ID, enforcing Zero Trust security principles and SCIM-based user provisioning/deprovisioning.
- Administered Atlassian Cloud (Jira Software, Jira Service Management, Confluence) workflow design, automation rules, permissions, SLA configuration, notifications and integrations.
- Built and maintained technical documentation, SOPs, runbooks and knowledge base articles, ensuring operational consistency and full audit readiness.
- Managed full hardware asset lifecycle using Snipe-IT procurement, deployment, maintenance tracking, and GDPR-compliant secure decommissioning.
- Collaborated closely with Information Security teams to enforce endpoint security standards, access controls and GDPR compliance across all IT systems.
- Delivered 1st-to-3rd line IT support, help desk, and remote end user support via Jira Service Management, resolving complex incidents and maintaining high user satisfaction across a distributed, international team.

Production Associate

Mar 2025 – Oct 2025

Tesla Gigafactory

Berlin, Germany

- Worked in a highly automated manufacturing environment, collaborating with engineering and operations teams to ensure reliability and uptime of robotic production systems.
- Analysed system logs, sensor data and operational metrics to identify root causes of recurring failures, contributing to a 10% improvement in overall line productivity.
- Applied Lean and Six Sigma principles to optimise workflows, reduce waste by 15% and improve process cycle times.
- Built and maintained Excel-based dashboards to track real-time performance metrics, supporting data-driven decision-making and continuous improvement.
- Developed strong understanding of incident response, operational discipline and change control in mission-critical environments.

IT Consultant

Miles IT

Sep 2024 – May 2025

Berlin, Germany

- Supported internal IT and infrastructure workstreams across multiple clients in fast-paced consulting environments.
- Administered Jira-based service workflows, improving SLA adherence and reducing ticket backlog by 30%.
- Identified operational inefficiencies and implemented process and workflow improvements aligned with ITIL practices.
- Produced and maintained clear documentation, SOPs and knowledge articles, improving service consistency and onboarding efficiency.
- Coordinated with vendors and internal stakeholders to deliver projects on time and within scope.

Senior IT Technical Support Specialist

Tech Mahindra

Apr 2021 – Jan 2022

Noida, India

- Delivered end-to-end enterprise IT support and help desk services across devices, applications and internal systems.
- Managed Active Directory user accounts, OU structures, and Group Policy (GPO) across enterprise Windows environments, handling user provisioning, deprovisioning, and access management.
- Resolved 1,000+ tickets annually using Jira, achieving a 95% user satisfaction score.
- Supported internal IT rollouts and change initiatives, ensuring minimal disruption to business operations.
- Maintained structured documentation and knowledge base management to improve team efficiency and SLA compliance.

Technical Support

HCL Technologies

Aug 2019 – Sep 2020

Noida, India

- Provided help desk and remote end user support for hardware, software, VPN, and network issues, managing escalations from 1st to 2nd line resolution.
- Handled password resets, account unlocks, and access requests within SLA targets, maintaining high first-contact resolution rates.
- Automated workflows using PowerShell and Excel macros, improving response times and operational efficiency.
- Created technical documentation and conducted knowledge-sharing sessions, increasing first-contact resolution (FCR) by 55%.

EDUCATION

Berlin School of Business and Innovation

Master of Business Administration (MBA)

Oct 2022 – Sep 2024

Berlin, Germany

Thesis: Integrating AI and Machine Learning to Transform Customer Experience in European E-Commerce

Major in Project Management

IEC University

Bachelor of Business Administration (BBA)

Jun 2017 – Aug 2020

Himachal Pradesh, India

Major in Management and Commerce

PROJECTS

01 macOS Zero-Touch Onboarding

Jamf Pro · Apple Business Manager · DEP · Bash · macOS

Automated full Mac provisioning pipeline using ABM and Jamf Pro PreStage Enrolment. New devices self-configure on first boot IT never touches the hardware. Eliminated hours of manual setup per new hire.

02 Endpoint Health Log Parser

Jamf Pro · Bash · macOS · Smart Groups · Monitoring

Bash script auditing 10 macOS health metrics (disk, memory, security state, pending updates). Deploys via Jamf Pro with exit codes feeding Smart Groups for automatic policy targeting and continuous fleet visibility.

03 macOS CIS Benchmark Hardening

CIS Benchmark · Bash · Jamf Pro · macOS Security · Compliance

Automated CIS Level 1 audit across 12 controls per device FileVault, Gatekeeper, SIP, Firewall and more with optional auto-fix mode. Delivers audit-ready compliance posture validated continuously without manual checks.

04 Intune Compliance Dashboard

Microsoft Intune · PowerShell · Microsoft Graph API · Azure AD · OAuth 2.0

PowerShell script using Microsoft Graph API to generate a self-contained HTML compliance report with per-device state and stale device detection. Shareable dashboard accessible to leadership without portal access.

05 Okta + Active Directory Group Sync

Okta · Active Directory · Python · REST API · LDAP · IAM

Python script comparing AD and Okta group memberships via LDAP and REST API, syncing changes automatically with a full JSON audit trail. Eliminates identity drift between systems and includes dormant account detection.

06 Excel-Based Forecasting & Reporting

Microsoft Excel · Data Analysis · Dashboard Design · Reporting Automation

Automated reporting workflows for JPMorgan Chase & Co. (Forage simulation) reduced manual processing by 10+ hours/week and improved forecast accuracy by 20% through structured Excel dashboards.

CERTIFICATIONS & TECHNICAL SKILLS

- **Certifications:** Jamf Certified Associate, Data Analytics Essentials (Cisco), Lean Six Sigma White Belt, Salesforce (LinkedIn Learning), Microsoft AZ-900 (in progress)
- **Work Methodologies:** Agile (Scrum & Kanban), ITIL Practices, Lean Six Sigma, Change Management
- **Languages:** English (Fluent C1), German (A2 — Intermediate)
