PROFESSIONAL PROFILE

System Operations Engineer with 6+ years of experience designing, automating, and operating scalable enterprise IT environments. Specialised in macOS and Windows endpoint management using Jamf Pro, Microsoft Intune, and Apple Business Manager, identity lifecycle automation with Okta (SSO, MFA, Workflows), Active Directory, and Azure AD, and SaaS platform administration across Atlassian Cloud and Google Workspace. Experienced in scripting with Bash, Python, and PowerShell. Holds Jamf Certified Associate credential. Proven track record of reducing manual effort, strengthening security posture, ensuring GDPR compliance, and delivering reliable IT operations in fast-growth organisations. Fluent English (C1)

Valid EU Bluecard residence permit · Berlin, Germany

Identity & Access Management | Okta | Identity Lifecycle (JML) | SSO & Federation | RBAC & Role Mining | SAML / OAuth 2.0 / ODIC | Endpoint Management | IT Operations | SaaS Administration | Automation & Scripting | ITSM | Security & Compliance | GDPR

CORE COMPETENCIES

- **Endpoint & Device Management:** Jamf Pro, Microsoft Intune, Apple Business Manager, macOS and iOS fleet management, Mobile Device Management (MDM), zero-touch deployment, device provisioning, patch management, endpoint compliance, configuration profiles
- **Identity & Access Management:** Okta (SSO, MFA, lifecycle management, Okta Workflows), Active Directory, Azure AD / Entra ID, IAM, SAML, OAuth 2.0, LDAP, least-privilege access control, SaaS access governance, Google Workspace integration
- **Automation & Scripting:** Bash, Python, PowerShell, Workato, Zapier
- **Cloud Platforms:** Amazon Web Services (EC2, WorkSpaces), Google Cloud Platform, Microsoft Azure, VMware virtualisation, Infrastructure as Code (IaC)
- **ITSM & Collaboration:** ServiceNow, Zendesk, Jira Software, Jira Service Management, Confluence, ITIL practices, incident management, SLA management, 1st–3rd line IT support, change management
- **Asset & Lifecycle Management:** Snipe-IT, hardware asset management, IT asset lifecycle management, IT procurement, device decommissioning
- **Security & Compliance:** SIEM platforms, OpenSearch, CIS Benchmark, endpoint security, access control governance, FileVault, Gatekeeper, backup and recovery, GDPR compliance, audit readiness

- **Productivity & Data Analysis:** Microsoft Excel, Google Sheets, data analysis and reporting, operational dashboards, KPI tracking
- **Observability & Monitoring:** Prometheus, Grafana, Alert manager, real-time system monitoring
- **AI-Assisted Workflows:** Google Gemini, Claude, ChatGPT, AI-assisted documentation, troubleshooting support, workflow optimisation

PROFESSIONAL EXPERIENCE

System Operations Engineer

Ada Health GmbH

Nov 2025 – Dec 2025

Berlin, Germany

- Designed, operated, and optimised internal IT infrastructure across Okta, Jamf Pro, Intune, Google Workspace, Google Gemini, Atlassian Cloud, and GCP, maintaining high platform availability.
- Led macOS and Windows fleet management using Jamf Pro and Intune zero-touch device provisioning, configuration profiles, patch compliance, and scalable onboarding/offboarding workflows.
- Implemented Okta Workflows and API-based automations, reducing manual provisioning effort by 40%, integrating 15+ SaaS platforms with SSO, MFA and least-privilege access controls.
- Administered Atlassian Cloud (Jira Software, Jira Service Management, Confluence), workflow design, automation rules, permissions, SLA configuration, notifications and integrations.
- Built and maintained technical documentation, SOPs, runbooks and knowledge base articles, ensuring operational consistency and full audit readiness.
- Managed full hardware asset lifecycle using Snipe-IT procurement, deployment, maintenance tracking, and GDPR-compliant secure decommissioning.
- Collaborated closely with Information Security teams to enforce endpoint security standards, access controls and GDPR compliance across all IT systems.
- Delivered 1st-to-3rd line IT support via Jira Service Management, resolving complex incidents and maintaining high user satisfaction across a distributed, international team.

Production Associate

Tesla Gigafactory

Mar 2025 – Oct 2025

Berlin, Germany

- Worked in a highly automated manufacturing environment, collaborating with engineering and operations teams to ensure reliability and uptime of robotic production systems.
- Analysed system logs, sensor data and operational metrics to identify root causes of recurring failures, contributing to a 10% improvement in overall line productivity.
- Applied Lean and Six Sigma principles to optimise workflows, reduce waste by 15% and improve process cycle times.
- Built and maintained Excel-based dashboards to track real-time performance metrics, supporting data-driven decision-making and continuous improvement.
- Developed strong understanding of incident response, operational discipline and change control in mission-critical environments.

IT Consultant

Miles IT

Sep 2024 – May 2025

Berlin, Germany

- Supported internal IT and infrastructure workstreams across multiple clients in fast-paced consulting environments.
- Administered Jira-based service workflows, improving SLA adherence and reducing ticket backlog by 30%.
- Identified operational inefficiencies and implemented process and workflow improvements aligned with ITIL practices.
- Produced and maintained clear documentation, SOPs and knowledge articles, improving service consistency and onboarding efficiency.
- Coordinated with vendors and internal stakeholders to deliver projects on time and within scope.

Senior IT Technical Support Specialist

Tech Mahindra

Apr 2021 – Jan 2022

Noida, India

- Delivered end-to-end enterprise IT support across devices, applications and internal systems.
- Resolved 1,000+ tickets annually using Jira, achieving a 95% user satisfaction score.
- Supported internal IT rollouts and change initiatives, ensuring minimal disruption to business operations.
- Maintained structured documentation and knowledge sharing to improve team efficiency and SLA compliance.

Technical Support

HCL Technologies

Aug 2019 – Sep 2020

Noida, India

- Supported cross-functional IT initiatives with automation tools and monitoring dashboards.
- Automated workflows using PowerShell and Excel macros, improving response times and operational efficiency.
- Created technical documentation and conducted knowledge-sharing sessions, increasing first-contact resolution by 55%.

EDUCATION

Berlin School of Business and Innovation

Master of Business Administration (MBA)

Thesis: Integrating AI and Machine Learning to Transform Customer Experience in European E-Commerce

Major in Project Management

Oct 2022 – Sep 2024

Berlin, Germany

IEC University

Bachelor of Business Administration (BBA)

Major in Management and Commerce

Jun 2017 – Aug 2020

Himachal Pradesh, India

CERTIFICATIONS & TECHNICAL SKILLS

- **Certifications:** Jamf Certified Associate, Data Analytics Essentials (Cisco), Lean Six Sigma White Belt, Salesforce (LinkedIn Learning), Microsoft AZ-900 (in progress)
- **Work Methodologies:** Agile (Scrum & Kanban), ITIL Practices, Lean Six Sigma, Change Management
- **Languages:** English (Fluent C1), German (A2 — actively improving)
