PROFESSIONAL PROFILE

System Operations Engineer with 6+ years of experience designing and operating scalable enterprise IT environments across endpoint management, identity infrastructure, and SaaS platforms. Specialised in macOS and Windows fleet management using Jamf Pro and Microsoft Intune, identity lifecycle automation with Okta, and SaaS platform administration across Atlassian Cloud and Google Workspace. Experienced in automation using Bash and Python, API integrations, and CI/CD workflows with Git and GitHub. Proven track record of improving operational efficiency, strengthening security posture, and delivering reliable IT operations in fast-growth organisations.

Endpoint Management | Identity & Access Management | IT Operations | SaaS Administration | Automation

CORE COMPETENCIES

- **Endpoint & Device Management:** Jamf Pro, Microsoft Intune, Apple Business Manager, macOS and iOS fleet management, Mobile Device Management (MDM), device provisioning, patch management, endpoint compliance
- **Identity & Access Management:** Okta (SSO, MFA, lifecycle management, Okta Workflows), Identity and Access Management (IAM), SaaS access governance, Google Workspace integration
- **Automation & Scripting:** Bash, Python, PowerShell, workflow automation, API integrations, Workato, Zapier
- **Cloud Platforms:** Amazon Web Services (EC2, WorkSpaces), Google Cloud Platform, VMware virtualisation, Terraform, Infrastructure as Code (IaC)
- **DevOps & Tooling:** Git, GitHub, CI/CD pipelines, configuration management
- **ITSM & Collaboration:** ServiceNow, Zendesk, Jira Software, Jira Service Management, Confluence
- **Asset & Lifecycle Management:** Snipe-IT, hardware asset management, IT asset lifecycle management
- **Security & Compliance:** SIEM platforms, OpenSearch, endpoint security standards, access control governance, backup and recovery, GDPR compliance
- **Productivity & Data Analysis:** Microsoft Excel, Google Sheets, data analysis and reporting, operational dashboards
- **Observability & Monitoring:** Prometheus, Grafana, Alert manager
- **AI-Assisted Workflows & Knowledge Automation:** ChatGPT, Google Gemini, AI-assisted documentation, troubleshooting support, workflow optimisation

PROFESSIONAL EXPERIENCE

Ada Health, Gmbh

System Operations Engineer

Berlin, Germany

Nov 2025 – Dec 2025

- Designed, operated, and optimised internal IT infrastructure across Okta, Jamf Pro, Intune, GitHub, Google Workspace, Google Gemini, Atlassian Cloud, Cloudflare, and cloud platforms (AWS & GCP)
- Led macOS and Windows fleet management using Jamf Pro and Intune, ensuring secure configuration, patch compliance, and scalable device onboarding and offboarding
- Implemented Okta Workflows and API-based automations, improving identity lifecycle efficiency, reducing manual provisioning effort, and strengthening security posture
- Administered Atlassian Cloud (Jira Software, Jira Service Management, Confluence), including workflow design, automation rules, permissions, notifications, and integrations
- Built and maintained technical documentation, SOPs, runbooks, and knowledge base articles to ensure operational consistency and audit readiness
- Managed asset inventory and lifecycle using Snipe-IT, covering procurement, deployment, maintenance, and secure decommissioning
- Collaborated closely with Information Security teams to enforce endpoint security standards, access controls, and GDPR compliance
- Delivered 1st to 3rd line IT support via Jira Service Management, resolving complex incidents and maintaining high user satisfaction

Tesla Gigafactory

Production Associate

Berlin, Germany

Mar 2025 – Oct 2025

- Worked in a highly automated manufacturing environment, collaborating closely with engineering and operations teams to ensure reliability and uptime of robotic production systems
- Analysed system logs, sensor data, and operational metrics to identify root causes of recurring failures, contributing to a 10% improvement in overall line productivity
- Applied Lean and Six Sigma principles to optimise workflows, reduce waste by 15%, and improve process cycle times
- Built and maintained Excel-based dashboards to track real-time performance metrics, supporting data-driven decision-making and continuous improvement
- Developed a strong understanding of incident response, operational discipline, and change control in mission-critical environments

Miles IT

IT Consultant

Berlin, Germany

Sep 2024 – May 2025

- Supported internal IT and infrastructure workstreams across multiple clients in fast-paced consulting environments
- Administered Jira-based service workflows, improving SLA adherence and reducing ticket backlog by 30%
- Identified operational inefficiencies and implemented process and workflow improvements aligned with ITIL practices
- Produced and maintained clear documentation, SOPs, and knowledge articles, improving service consistency and onboarding efficiency
- Coordinated with vendors and internal stakeholders to deliver projects on time and within scope

Tech Mahindra

Senior IT Technical Support Specialist

Noida, India

Apr 2021 – Jan 2022

- Delivered end-to-end enterprise IT support across devices, applications, and internal systems
- Resolved 1,000+ tickets annually using Jira, achieving a 95% satisfaction score
- Supported internal IT rollouts and change initiatives, ensuring minimal disruption to business operations
- Maintained structured documentation and knowledge sharing to improve team efficiency and SLA compliance

HCL Tech

Technical Support Analyst

Noida, India

Aug 2019 – Sep 2020

- Supported cross-functional IT initiatives with automation tools and monitoring dashboards
- Automated workflows using PowerShell and Excel macros, improving response times and operational efficiency
- Created technical documentation and conducted knowledge-sharing sessions, increasing first-contact resolution by 55%

EDUCATION

Berlin School of Business and Innovation (2024)

Berlin, Germany

Master of Business Administration (MBA),

Oct 2022 - Sep 2024

Thesis: Integrating AI and Machine Learning to Transform Customer Experience in European E-Commerce

Major in Project Management

IEC University (2020)

Himachal Pradesh, India

Bachelor of Business Administration (BBA),

Jun 2017 - Aug 2020

Major in Management and Commerce

PROJECTS

Excel-Based Forecasting & Reporting – Forage (JPMorgan Chase & Co. Simulation)

Jun 2024

- Created automated reporting workflows that improved project transparency and reduced manual processing by 10+ hours/week
- Built an Excel dashboard to enhance data visibility and support project decisions, improving forecast accuracy by 20%

CERTIFICATIONS & TECHNICAL SKILLS

- **Certifications:** Jamf Certified Associate, Data Analytics Essentials (Cisco), Lean Six Sigma White Belt, Salesforce (LinkedIn Learning)
- **Work Methodologies:** Agile (Scrum & Kanban), ITIL Practices
- **Languages:** English (Fluent C1), German (A2)
